SOFT SKILLS

Problem Solving, Analytical Thinking, Attention to Detail, Troubleshooting & Investigation, Cross-Functional Collaboration, Communication, Time Management, Adaptability, Accountability, and Continuous Learning.

EXPERIENCE

Product Operation | Digital Operation – Digital Problem Management

Jun 2026 – Sep 2026

PT Bank Raya Indonesia Tbk – Digital Operation Division | South Jakarta, Indonesia

- **Incident Management** : Investigate and resolve 150+ digital banking and operational incidents, achieving a 96% resolution rate across Payment, Digisaving, and related digital banking services.
- **Payment Troubleshooting** : Troubleshoot QRIS, interbank transfers, e-wallet transactions, and merchant settlements, including failed transactions, deducted funds, delayed settlements, and balance discrepancies.
- **QRIS Merchant Operations** : Support merchant registration, deletion, settlement monitoring, and daily reconciliation of QRIS transaction notifications and merchant funds.
- **External Partner Coordination**: Coordinated incident resolution with internal engineering teams and 9+ banking/e-wallet partners (BCA, DANA, GoPay, etc.), maintaining seamless cross-platform transaction flow and strict SLA compliance.
- **Application Support** : Provide technical investigation and application support for Raya 2.0, covering face verification, customer data validation, login/activation, Raya Debit VISA activation, and ATM BRI transaction issues.
- **Data Patching & Administration** : Perform customer metadata updates and data patching, including referral code records and related customer information.
- **CMS Administration** : Process Maker & Signer changes within the Corporate Management System (CMS), ensuring accurate and timely updates.
- **System Monitoring** : Conduct proactive Grafana monitoring to identify potential operational issues and support service continuity.
- **Documentation & SLA** : Maintain incident records, investigation findings, and operational follow-ups through Jira and Confluence in accordance with SLA and IT operational procedures.

- **Data Validation** : Performed SQL-based data validation and troubleshooting, achieving >99% data accuracy and reducing data anomaly risks in operational reporting.
- **Process Automation** : Automated recurring reporting workflows using Microsoft Excel Macros and optimized SQL queries, cutting data processing time by 20% and improving operational efficiency.
- **Data Migration & Access Management** : Supported data migration for 100+ users to the FRAOnline platform using Role-Based Access Control (RBAC), ensuring data integrity and accurate access provisioning.
- **Technical Incident Resolution** : Investigated and resolved 400+ data-related technical incidents with a >95% success rate in accordance with SLA requirements.
- **Data Troubleshooting** : Performed data verification, query analysis, and troubleshooting to identify and resolve discrepancies affecting daily operational data retrieval and reporting.
- **Operational Support** : Supported daily data operations and reporting processes while maintaining service continuity and data reliability.
- **Cross-Functional Collaboration** : Coordinated with relevant teams to investigate technical issues, resolve data discrepancies, and improve operational efficiency.
